

tesa® 52332

300 µm plate mounting tape, permanent bond

tesa® 52332 is a double-sided tape of 300 µm (12 mil) thickness with a PVC backing and an acrylic adhesive.

It is designed for demanding plate mounting applications, especially where high adhesion is required and plates are mounted permanently.

This is for example the case in corrugated board postprint where plates are commonly mounted to carrier films and hung vertically when stored.

The structured PP liner prevents the formation of air pockets during plate mounting.

Main Application

Plate mounting for various applications, especially for permanent bonds

Technical Data

▪ Backing material	soft PVC	▪ Type of adhesive	tackified acrylic
▪ Thickness category	300 µm	▪ Type of liner	PP
